

I am Paul Rich McGann, former board of AADB from Pittsburgh. About Hawk DBRS, it is very good, and we need that to show of our needs. Yes, we can use DBRS to make phone calls with legalistive members and ask them to provide the supports as much as we can. We cna use DBRS for making medical apointments or quesitons of health issues. There are many thigns that we can do the same way as how hearing people are using in many ways.
