Dear Federal Communications Commission,

Free and democratic exchange of information is essential for a vibrant democracy. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. Corporate Gatekeepers are inappropriate and harmful to our democracy.

Sincerely,

pam alger

Dear Federal Communications Commission,

Comcast's blatant and deceptive blocking of peer-to-peer communications, the which you may or may not have heard about by now, is exactly the problem millions of Americans have warned would occur without the formality in law of Net Neutrality protections.

The FCC must take timely action to put an stop to this harmful and dangerous practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation--and calling it "sound business practice."

Dear Federal Communications Commission,

With all that is going on in our world and all that is an affront to democracy, please stop Comcast and set an example of why we live in such a great society.

If someone is actually reading this, then ask yourself really what corporations, with all they can do to help the economy, should and shouldn't be allowed to do. Do you know the legislation behind governing and regulating the internet?

Throttling traffic is a glimpse of the future of No Net Neutrality and it's bleak. Please protect one of the citizens last unregulated and free domains.

Punish Comcast, set an example.

Sincerely,

Tim Blasko

Dear Federal Communications Commission,

Comcast's blatant and deceptive blocking of peer-to-peer communications is the cause of lost time in my busy schedule.

Not only was time lost in my business online when my internet requests were "delayed" but I also spent several hours on the phone with COMCAST to troubleshoot the delay in my connection, never to fix the problem.

Today it was announced that COMCAST was indeed delaying file requests by users who had installed BitTorrent on their machines. I installed BitTorrent on my computer approximately 8 weeks ago - precisely the time when my regular internet connection began experiencing delays.

The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
