To: The Chief, Wireless Telecommunications Bureau

I am concerned as to Data and RTTY emissions affecting the Hawai'ian Islands and the Insular Islands and associated areas which have an FCC assigned in the 7075-7100 kHz sub-band which was set aside due to foreign broadcasters in the 40 meter band.

A mixture of Data, RTTY and Single-Side Band Voice is NOT technically compatible in this 7075-7100 kHz, Insular Areas sub-band.

If this is a consideration by the FCC Wireless Telecommunications Bureau NOT to mix these modes, then I am in FAVOR of this Rulemaking, RM-11392.

Respectfully submitted,
