

Don't let individual companies dictate the rules of exchange on the internet. We must have neutral control over how the internet is used or it will become another tool serving individual big corporation interests. Our news media is headed that direction as well. Please stop this trend with the internet and the news media! Our democracy depends upon a truly free media.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
