Re: WT Docket No. 02-55, ET Docket No. 00-258, and ET Docket No. 95-18

Dear Ms. Dortch:

On January 23, 2008, Doug Brandon, Vice President, Regulatory Affairs, TerreStar Networks Inc. ("TerreStar"), and the undersigned, counsel to TerreStar, met with Renée Crittendon of Commissioner Adelstein's office. During the meeting, the TerreStar representatives discussed the points TerreStar made in its "Comments of TerreStar Networks Inc.," which was filed on December 18, 2007, in the above-

referenced proceedings, and provided an update on the timetable for producing a final technical report (an interim technical report had been attached to TerreStar's comments).

In addition, the TerreStar representatives addressed TerreStar's progress in clearing fixed service ("FS") microwave licensees from the 2180-2200 MHz band TerreStar will use for downlink transmissions. They discussed how factors such as the ability to steer TerreStar's satellite spot beams and the location of the relevant microwave paths mean that a much smaller universe of links needs to be cleared than are licensed in the band or are required to be relocated by Sprint in the broadcast auxiliary service in the 2000-2020 MHz uplink band. They also explained that a number of links have been cleared or are in the process of being cleared, and that TerreStar is on schedule for clearing all necessary FS links in time for its service launch.

Please direct any questions concerning this filing to the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Godles", with a stylized flourish at the end.

Joseph A. Godles
Counsel to TerreStar Networks Inc.
