

America is built on the free enterprise economic system. Right now, High Speed Internet Services are to be controlled by a few companies that will determine the content carried in the internet's communication capabilities. The government must protect our airwaves from the same corporate gatekeepers that have stifled innovation and competition in Internet markets.

The FCC must ensure that the upcoming auction sets aside spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

Total control of the airwaves should not be handed over to a cartel, or worse, a monopoly. Keep free enterprise alive!
