

I have sent prior complaints about Century Communications to the FCC. within the last year 2 that I can remember about the same items:

1) I am paying Verizon for Cable TV and Internet because of horrible service by Century. When I was sold this home in Live Oak no one explained that I was tied to these idiots for 15 years!!! I had modem speeds checked (they were slower than death). Service was down days at a time and my work from home required that I go somewhere else for service. The TV was just as bad with no HD and very few choices.

2) I think it is clear this was an inside family deal with Transeastern. It should be illegal to cheat people like this. In my business if I gave my brother a \$1.6 Million per year contract under these conditions I would probably go to jail. How do these people get away with hiding all of this????

The fact is, they give poor service, period. They have poor product, period. They have the contract under misrepresented conditions, period. I would ask that the Federal government be willing to step in and protect it's citizens under these circumstances and keep this from happening to others.

Thank you.

Randy Thorp
