

I am a resident of Live Oaks in Tampa, FL where we receive service from Century Communications. The service is by far the worst service I have ever received regarding TV and Internet service. Not only is it working part of the time, but they limit their options as to what they offer for their services. They have monopolized the subdivision by locking themselves into a ten year contract not allowing any other service to compete with Live Oaks.

Century Communications has grandfathered themselves since the originating company that built Live Oaks went Bankrupt. Please help us be rid of this service which offers nothing but disaster to its clients.
