

Century cable should not be allowed to operate a business. Their internet/cable service is below sub-standard. They offer LIMITED channels AND the picture is so grainy you can actually count the pixels. The internet service is atrocious. You can count on the server going down several times a day/night and most times your not even running at 56k. One customer service rep actually had the nerve to tell me that I needed more memory and to clean the cache. My response was I have a brand new, out of the box computer with 500GB, 256GB of RAM w/a AMD Dual Core Processor Pro 6500+ - now tell me again that I need more memory. All I got was silence. And this is what we pay \$100 dollars a month for? GET CENTURY OUT NOW!!!!
