

I have read many of the comments already filed.

I have been receiving numerous calls from a telemarketing company although I am registered on the National Do Not Call list. I have asked them to stop but they will not. This is getting to the point of harassment by this company and I feel at this point I'm hoping someone with authority can get involved and end this harassment. The phone number that keeps calling is 1-800-374-8503. I believe this number belongs to a company called Nationwide. I believe they are a telemarketing company. I would be grateful in any help you can provide.
