

Dear FCC:

Today is the deadline for comments and I thought I had made comments over a month ago but don't see them now. Here is a summary of my Points for MAINE.... This is in addition to VERMONT Senator Sanders points which I agree with and I think apply here in Maine.

- 1) I am a UNICEL Customer using a GSM phone that works great
- 2) I Love GSM because my phone works in Canada and Ireland.
- 3) Verizon is a CDMA carrier and could choose to:
 - a) Force me to get a new CDMA handset.
 - b) Neglect the GSM network here in Maine in favor of their CDMA system.
 - c) Require me to upgrade and pay more than I am paying with my current Unicel Plan

PLEASE mandate that Verizon make a written

- * Commitment to provide coverage throughout the State of MAINE
- * Commitment to maintain and expand the GSM network indefinitely or to sell the GSM network to a provider who would maintain and expand it.
- * Commitment to provide automatic roaming services at reasonable rates to other carriers.
- * Commitment to Current UNICEL customers to maintain their current plans and RATES for as long as the customer chooses to keep the plan.

THANK YOU!

-Bob OConnor
