

On February 8, 2008, Karen Peltz Strauss, representing CSDVRS, LLC, had a brief meeting with Ian Dillner of the Chairman's office to discuss setting a timeline for issuance of the FCC's order requiring uniform numbering for VRS and IP relay users. At the meeting, the merits of having a single, centralized database as compared with multiple databases were discussed, per the ex parte filed in this docket by CSDVRS on February 4. No materials on a numbering plan were left with Mr. Dillner.
