

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

It must also be said that it is UNACCEPTABLE that Comcast PAID a large number of dis-interested parties and its employees to take up seats at the Feb 25 Boston hearing to keep the HUNDREDS of public citizens out and to keep you from hearing the TRUTH!!

These tactics alone prove that Comcast's intentions are NOT pure by any means, and that their methods are ANTI-competitive and against everything that the Internet was designed to be... the free flow of online information to everyone.

Please keep that information flowing!
