

Comcast engages in deceptive marketing practices, and damages the internet as a whole because of its own corporate interest. It has FAR too much power to control the internet because it operates with monopolistic actions. There needs to be stricter oversight of Comcast to ensure it practices net neutrality and allows fair access and free speech for all paying customers.

THE INTERNET SHOULD BE OPEN, FREE AND FAIR.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
