

America is a country where the RULE OF LAW is followed to provide justice and FAIRNESS. We are tired of Corporations continually trying to get around and influence the laws. Companies that do not agree with working within the rule of law should move to Communist country where they can become the media of the state. It is IMPERATIVE that the FCC protect the Internet and keep Corporations from stifling the freedom of the Internet.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
