

doj and fcc delay is an outrage for the length of time without an answer! this is not a monopoly claimed by the nab, it's a pay for service and if you don't want it don't subscribe!how do you the fcc approve mergers like att/sbc,and exxon/mobil,texico/chevron witch are things people need and can't do without? if you don't subscribe to satellite radio you still have plenty of options am/fm,i-pods,m-p3's,internet radio,slacker satellite wi-fi radio.your delay is unexceptable! stop delaying and make a decision for gods sake so mel k. of sirius can sue the doj and fcc like whole foods and wildoats did and won i might add,oh and how about all car companys support the merger! this should be your clue it's good for the consumers!!! the nab is fighting so hard against the merger,why?because satellite radio and am/fm compete period! get off your duffs and act one way or the other!!!!!!!

one sad american tom rux
