

Net Neutrality is essential to democracy. What countries can you think of that have allowed their paths of communication to be purposefully silenced? Totalitarian regimes, countries we claim to be more progressive than...that's who. If you care at all about democratic participation and the future of this country and its people, the FCC must take serious and immediate action to prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.

Please. You are in a position of power--and responsibility. Consider the precedent Comcast is setting for the future of democracy--something this country supposedly stands for. You stand at a crossroads. Either you support the rectification of the wrong that has been done against the people of this country and protect our constitutional freedoms, or you don't and we can no longer proudly flaunt the democracy we no longer enjoy.

Thank you for your time.

Respectfully yours,
