Dear FCC:

It is clear that both Sirius Satellite radio and Xm Satellite radio have been posting billions and millions of dollars in losses each year. Both companies face the challenge of extinction. I encourage all of congress and Senate to look at the spread sheets, who is netting the profit? Gene Green of Texas has compared this merger to the proposed merger of DirecTV, and Dish Network. This is not at all the same business, First their are millions more subscribers to Satillite TV, then their are to Satillite Radio, also Satillite TV subscriptions cost hundereds more then Satillite radio. Gene Green has said that he is scared for the consumer that their subscriptions will go up from \$12.95 a month to \$25 a month, how is this possible when both companies have promised and agreed to have A La Carte offerings, that start at \$6.99 A Month, and both the combined subscriptions of Xm and Sirius will be \$14 a month currently a savings of \$10 a month from subscribing to both Xm and Sirius. Sirius posts -1,104,870,000 loss 2006, -863,000,000 Loss 2005, -712,160,000 loss 2004, -226,220,000 Loss 2003. Xm Satillite radio posts -682,380,000 Loss 2007, -718,870,000 Loss 2006, -666,720,000 Loss 2005, -642,370,000 Loss 2004. Exxon Mobile posts 40,610,000,000 Net Income 2007, 39,500,000,000 Net Income 2006, 36,130,000,000 Net Income 2005, 25,330,000,000 Net Income 2004, Who has the real monopoly?. DirecTV posts 1,451,000,000 Net Income 2007, 1,420,000,000 Net Income 2006, 336,000,000 Net Income 2005. Look at the speerd sheets. Both Xm and Sirius have agreed to all regulations, they will not jack up their prices, what is the big deal.

Sincerely,

alex cassity
