

On behalf of myself and my employees at WPXT/WPME Portland/Lewiston, please reconsider the quarterly localism report. Because we are a small market station it is quite a burden to be required to complete this new report. Our staff works extremely hard to provide our viewers and sponsors with a quality product in what is a competitive time for television programming. We strive to be unique, detail oriented and follow all FCC regulations to the letter. This extra task, unfortunately, may take away from our ability to create and air the exact kind of programming that the report seems to be encouraging us to air. With no requirements or way for us to measure our own success in the eyes of the FCC, this report appears to be a waste of resources better spent on creating new, informative and innovative programming that will serve our viewers and the community at large. Please reconsider this requirement. Thank you, Katie Booker
