Dear Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

STOP ALLOWING BIG companies to tell America what we are to do.

AS FAR AS I KNOW AMERICA is still a free country.

FREEDOM OF COMMUNICATION IS AMERICAN!

AND FOR THE PEOPLE!

FREEDOM OF SPEACH IS AMERICAN!

AND FOR THE PEOPLE!

FREEDOM TO CHOOSE IS AMERICAN!

AND FOR THE PEOPLE!

WHEN BIG BUSINESS INTERFERES WITH OUR BASIC

RIGHTS AND FREEDOMS...THIS IS JUST WRONG!

FREE THE IPHONE!

Sincerely,

Ms. Kathy McLean

Mr. Chairman,

I urge you not to support the idea of "open access". It is an anti-free market sham. You cannot diminish the value of the spectrum in order to reward the few and punish American taxpayers.

The government should not decide who wins and loses regarding advanced communication services. You should not support regulation of the wireless technology.

The free market should determine who has or hasn't.

Please reconsider your stance on this issue.

Thank You,

John Larson

Washington, DC 20554

Dear Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Mr. Jeffrey Brown
