

When we moved to Live Oak Preserve back in 2005, we tried Century Communications Service. It only took us 3 weeks to notice their lack of knowledge and poor service. They had to change my set top box over 4 times and still it didn't work correctly. I got FIOS service ever since then even though I pay double. But it is worth it.

I like to think that we live in a democracy. But when I see Monopolies like Century Communcations. It makes question it.

We,the consumers, are the ones that need to have the freedom of choice of whom we want to supply us Cable services, phone, etc.

That would be democracy!
