**Customer Proprietary Network information (CPNI)
Accompanying Statement to Annual Certification of CPNI
For
Bee Line Cable**

A. Training.

Bee Line Cable has trained all personnel with access to CPNI as to the identification of CPNI and when CPNI may be used and has expressed the disciplinary process for any improper use of CPNI.

CPNI training consisted of verbal and instructional training which also included hard copy materials. Each employee read the CPNI manual Bee Line now keeps in its CPNI file. The materials were gone over with each employee. They were each given a chance to ask questions. When they each understood the rules, they signed the last page of the manual to show they were trained and that they understood the new CPNI regulations we need to follow. We also had one-on-one training with the new updates to our cable software. Our software provider, Great Lakes Data, has done a specific update to our industry specific software to meet the standards of the new rules. Each employee was shown where and how to validate the CPNI specific information with our subscribers. This will also be part of the standard training with any new employee hired that will have access to CPNI.

B. Use of CPNI in Regards to Marketing.

At all times, past and present, general marketing or promotions have been, and are sent to our entire customer base. Therefore, according to the new rules, we do not use CPNI currently for marketing or promotions.

In addition, no future outbound sales and marketing campaigns will be conducted without management approval and will require supervisory review to assure compliance with the CPNI rules.

C. Compliance Certificates.

Bee Line Cable will keep a copy of this Certificate and all future certificates on file. They will be signed by an officer of Bee Line Cable and will be available for public inspection at any time during regular business hours.
