

I am writing to voice my support for the merger between Sirius and XM satellite radio as I feel that it would be best for me the consumer to be able to receive all of the different programming available via a satellite signal without having to subscribe to two different services. For example XM has MLB and the NHL, while Sirius has Nascar and the NFL, so to receive MLB and the NFL via a satellite signal I have to pay for both services which costs me double what it would if the merger were to be approved. Furthermore, I do not view XM and Sirius as the only two competitors in this medium. I believe that satellite radio in and of itself is a competitor with standard AM/FM radio as digital music mediums like i-tunes. Thank you for your consideration on this matter and I look forward to receiving the good news in the future that the merger has been approved.
