Dear Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Mr. V. Burger
1016 Bob Little Rd Lot 9
Panama City, FL 32404-5973

Dear Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- however, Shit policies allow companies like AT&T to shackle great products to their own, closed and exclusive networks.

We need to stop fucking around and free the internet once and for all. We are in a developing technical environment, the last thing we need is limits. To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market. most def.

Make an innovative decision, allow us to move forward, not be held back. Allow us to purchase products freely on our own market.

Sincerely,

Mr. Austin Sprenkel

Washington, DC 20554

Dear Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Mr. Josh Hammans
1412 Sangaree Cir
Virginia Beach, VA 23464-7993
