

Entercom Radio in Rochester, NY has brought this information to my attention. I am strongly opposed to the FCC to take away the right of local radio stations to use local agencies to produce public service announcements. The New York State Police has worked closely with Entercom on many other local media outlets to send important messages to members in our community. I think we should continue to provide this information to our neighbors, not Washington.

Thank you for your time,

Sincerely,

Trooper Mark J. O'Donnell

Public Information Officer

New York State Police, Troop, "E"
