Re: Please include in the record for 07-51

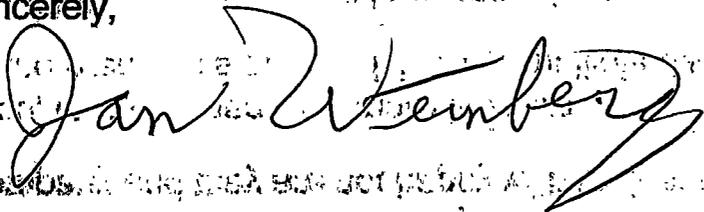

To Whom It May Concern:

I have been told that the F.C.C. may change the way our private cable provider must do business. Some of my friends are doing business with a major cable company and they are not happy with their service.

Also, many of them pay more than we do for the same channel lineup with many of the premium stations. I live in a multiple dwelling unit.

Please don't do anything to change the rules in any way so that our company becomes less competitive.

Sincerely,

FCC: Please include this letter in the record for 7-51.

Dear Ms Dortch:

I am the manager of a high rise condominium community in Los Angeles. Our cable tv service used to be provided by the local franchised operator (currently Time Warner). We had many problems with the quality of the service they provided and many of our residents were extremely unhappy.

Five years ago we switched to a Private Cable operator (TV-Digital). They designed a customized bulk channel line up for our residents that includes many international channels that was cheaper than the one offered with less channels from the franchised operator. We are extremely satisfied with the service we receive from TV-Digital. They respond immediately to our service needs.

In our experience private cable operators raise the standards that all telecommunication providers must meet to survive. We do not want the FCC to make any changes that would interfere and make it impossible for them to continue providing us with services.

Sincerely,

Bruce Tayefeh
Property Manager

FCC: Please include this letter in the record for 7-51.

Dear Ms Dortch:

We are a large multi dwelling condominium community. I have worked here for the last 18 years. When I started the local cable company provided the communication services for the building. We had a long list of complaints with them. Their service would constantly go out, it was extremely difficult to get them on the phone and to come out and repair the problems. When a tech would show up, he usually had no idea of what the problem was or how to go about fixing it. Problems never got resolved. The home owners were extremely dissatisfied and frustrated.

After removing Adelphia from the building we had a private cable company design and build a custom bulk program line for our home owners. We are extremely satisfied with the service we receive from TV-Digital. They respond immediately to our service needs. Just yesterday an electrical problem caused a cable tv outage to the entire building. Even though it was early on a Sunday morning, they had a technician at the property and the problem resolved within an hour. That is excellent service.

We want TV-Digital to continue to be able to provide service to our residents. We hope the FCC does not do anything that would interfere and make it impossible for them to continue service.

Yours truly
