

I AM REALLY GETTING FED UP WITH THIS!

I am plumber. I get up every day and go to work. I bust my a&& for about the next 12 hours, only to come home to find out the NAB is calling on all their friends to press you into making a wrong decision! Almost to the point of sounding threatening. 3 percent of Americans CHOOSE to PAY for satellite radio!

The NAB has attorney generals, senators, and various "influential big wigs" send letters to the FCC about a merger that is frankly none of their business. A google search of any of these people reveals ties to the NAB and Eddie Fritts.

I am disgusted to learn that in a time of trial for this country, these elected officials have nothing better to do with their days than to support a political lobbying group in its efforts to take away YOUR power as FCC commissioners through intimidation!

Frankly, I'm afraid. I'm afraid that you may bend to this intimidation. I would then be ashamed to be an American...

I'm close to it now....
