

I think it would be a travesty if the FAA were to stop the air waves from preaching the gospel when it is soooo needed at this point in time. I can think of dozens of people whose lives have been changed forever, if not actually saved, by listening to the WORD on KLove radio network. Not only would it be unconstitutional to cancel this, it probably would send our whole country, if not the world into a tailspin from which we could never recover. This is the only radio station I listen to and would be lost without it. Thank you.
