To whom it may concern:

Robert Daniel's Vlog was just being viewed moments ago myself and I, very much, agreed with him about our having the individual phone number for Video Phone (VP) right from the NPAC database which the hearing people use for their cell phones. It is highly recommended that we should go ahead and do the same way as the hearing people have for their cell phones to make it a lot easier on the deaf and hard of hearing people so each of us can give all our doctors, teachers, or whoever need to contact us through the Video Relay Service (VRS) and that would be a great blessing to have one for every deaf and hard of hearing person who uses VP or VRS.

Thank you,  
Jeanne M. Lambert
