

To the FCC regarding proceeding 04-233

Radio should be free. Our first amendment rights guarantee the freedom to proclaim that which is honorable and respectable. Christian radio does not broadcast hate speech, nor does it proclaim anti-American sentiment. There are other broadcasts that do such things and they are not censored because of their first amendment rights.

Christian radio is not a plague and therefore censorship of Christian radio, or any radio for that matter, should be avoided. Government intrusion and regulation into the free speech of Christians would reverse hundreds of years of the protection of our right to speak freely. Free speech should not be limited just because someone disagrees with the sentiment.

Please, FCC, keep Christian radio free from forced intrusion of differing viewpoints that would be directly against the truth of Scripture.

Sincerely,

Pastor Rick Wulf
