

The prominent Christian radio station in my area is K-LOVE. This radio station and its ministry has positively impacted me and my family. I financially support K-LOVE, as it is a listener supported station, because I want it to stay on the air for my family and for everyone in my community. I don't believe that others in the community who do not share the same faith should be able to control or have an impact on how Christian radio is broadcast, especially when it's the listeners who support it. If they don't like the radio station, they should not listen to it. If I didn't care for country music, pop rock, etc, then I change the station to something that I do like. I believe the proposed rule changes violate every American's freedom to speech and freedom of religion by making it even more difficult to keep Christian radio on the air. Please do not adopt these proposed changes - my family and THOUSANDS of others DEPEND on Christian radio to keep us encouraged in the society we live in. There are so many negative forms of media out there, why would you want to keep the community from such a positive message?
