

Dear FCC,

I am very concerned about the proposed rule changes outlined in Proceeding 04-233. I currently listen to Air 1, K-Love and Family Life Radio stations on a daily basis in Arizona. They provide a very valuable service to me, my family and my community. They support family and God based ideals which positively impact our society and community.

The possibility that Community Advisory Boards could be appointed that would have the right to restrict the free speech of the radio stations is a direct violation of my rights to “Freedom of religion and speech.” I can’t even believe it is being proposed by an American government!! This is something you hear about in countries without separation of church and state. Basically, this board could force the radio station to follow their “belief system”. I am VERY OPPOSED to this proposal!!!

I have no idea how requirement of additional staffing is even logical. I thought businesses, even non-profit businesses were free to run their businesses as efficiently as possible. I am very opposed to this proposal.

Finally, I am opposed to any proposed legislation, which would force any of the stations off the air. They provide a very valuable service to their listeners and the community at large.

Thank you very much for your consideration of my comment.

Kathryn Merrill-Ventura
