

I am concerned with proposed changes because I find great enjoyment in listening to stations such as Air-One and feel these costs may hinder its ability to stay in the area. I am also concerned with free speech yet feel the areas to censor are not religious stations. Our country was founded on our forefathers belief in God and it would be a shame to hinder these stations in any way. I think the more compelling area to censor are mediums that use pornographic, violent and profane language to send messages to our inhabitants of this country.
