Commissioners Michael Copps, Jonathan Adelstein, Deborah Taylor Tate, and
Robert M. McDowell
Federal Communications Commission
445 12th Street SW
Washington, DC 20554

FILED/ACCEPTED

APR 21 2008

Federal Communications Commission
Office of the Secretary

Commissioners:

On behalf of 22,017 concerned activists from all over the United States, I ask that you include in the official record of the FCC's public hearings their signatures on this petition supporting the concept of net neutrality. I also ask that you take their views into account when making your decisions about the future of the internet.

The petition states that,

I support the broad concept of net neutrality and specifically the Internet Freedom Preservation Act of 2008 from Representatives Markey and Pickering. Powerful phone and cable companies should NOT be allowed to block, degrade, censor or discriminate against content with which they do not agree.

Millions upon millions of Americans rely upon an open Internet in their daily lives. Our elected leaders must protect our basic right to communicate. After all, what good is free speech if powerful corporations have the ability to shut off or slow down viewpoints they find objectionable?

Thank you. If you have any questions about CREDO's support of net neutrality legislation, please do not hesitate to contact me at the address above, or by phone at 415-369-2002.

Sincerely,

Michael Kieschnick
President, CREDO Mobile

- "Moment by moment this country looks more and more like a neo-fascist dictatorship. Our constitution, our economy, our dummying down of the educational system and the disappearing role of the voting citizenry as our elected representatives listen more to lobbyist and corporate machines than to the needs of the majority of the population. Less than 26 percent of the people of this great nation feel that the last eight years have been anything less than a ludicrous, terrifying debauchal. When professors cannot communicate without "administrative approval" to the public, when corporations control the internet, when someone like Bush can keep someone as dispicable as C. Rice in office and condone waterboarding this country is not only in decline, it is raped and pillaged! Somewhere there is still an echo of democracy, are you capable of remembering it's beauty? it's dignity? or are our "elected officials" simply the dregs of a corrupt society? "

"Sir or Madam, I have been helping people build websites for years. Websites around which their dreams revolve. From building small businesses to discussing scrapbooking these websites allow them to earn money and be self fulfilled. Many of these dreams would be destroyed should the internet no longer be as free as it currently is. Whats more many of the content sites which provide students with access to math help, history information, and more would go away. Most content companies that make the internet a place to search for information have very small margins or earn nothing. They should not have to jump through any more hoops to provide information to people. Thank You Ty Hulse "	Rhonda Duckworth Seattle, WA 98146
Ty Hulse Prosser, WA 99350	"If telephone networks are common carriers, then it stands to reason that the internet should be as well. "

	Carl Nelson Lake Stevens, WA 98258

"Remember, if you close this avenue to revealing truth, you close it for yourself as well. People are angry and fed up with the manipulation of truth that has grown to epidemic proportions at governmental and corporate levels. Man's character is not innately kind nor unselfish; it is innately deceptive and selfish. Cesar couldn't find truth then and he can't find it now; yet truth does exist and its value is more precious than gold. Please consider the root of foul play and individual accountability, rather sooner than later, when tempted to hide from institutional culpability. Pornography is not truth, but abuse. If you really want to establish a worthy legacy, try making your accomplishments rate value."

Shelton, WA 98584

"The internet is currently the surest form of democracy in this country. Restricting anyone's use of it is violating my right to free speech. We are all responsible for using it wisely and noone should be able to dictate to a population what they can and can not do with their access to the internet. It also brings our world together at a time when our country has alienated so many people of the earth. Please support the bill for INTERNET FREEDOM. Thank you.."

"This whole Internet thing began on the taxpayer's nickle - with Darpa Net - it's important to us that the big corps. don't get to take it away from us. We PAY them to use their communications services, they must not be permitted to dicate what constitutes "appropriate" content."
