

I am writing to express my concern for the changes proposed to occur on our airwaves. K-Love is a Christian radio station that provides the spiritual food needed to get through life's hardships. Suicides have been prevented, marriages saved, and life has been made more enjoyable due to its specific Christian content. According to the First Amendment, free speech has always been a right that every citizen -- and the press -- holds. Language was specifically included that protects the exercise of religious expression. Please keep these things in mind as you continue in this decision process, and be mindful to include representatives from the Christian faith on a Community Advisory Board, if you proceed with establishing one.
