Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Brent Allen

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Patrick Annabel  
PO Box 245  
West Fork, AR 72774

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Comcast was using Web filtering technologies similar to those used in China to censor the Internet. AP called the violation "the most drastic example yet of data discrimination." Blocking our access to the Internet should never be tolerated. The longer the FCC waits to punish Comcast, the more companies will continue to invest in technologies to censor and manipulate what we can do online. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jesse Barr  
22758 Barr Road  
Winslow, AR 72959

I have been blocked for several days on two separate occasions by Comcast. In each instance it was when I had sent a political message to four of my friends who have Comcast as an ISP. There is no question in my mind that Comcast is discriminating against various classes of Internet users! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Wesley Barton

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. To let them do what they want would be the same as letting this country be run under a dictatorship. If the net is not left alone, and there is no more Neutrality, then we would be letting some company like Comcast decide what we should, or shouldn't see and learn. That would be them taking away some of our rights that this country was build on. I say our government needs to go back and look at the way they were set-up in the first place, and that is that they work for all of us, and NOT for just a few select companies! This is a country build on freedom, NOT on dictatorship!

Andrew Beekman

B. R. Black  
1408 Pigeon Creek Rd  
Mountainburg, AR 72946

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech - particularly in rural areas. We simply can't allow large telecommunications companies, such as Comcast to smother these democratic communications by discriminating against new technologies. The fact that Comcast secretly interfered with interstate Internet traffic and denied such actions until exposed by the press is particularly egregious. Fines and other sanctions against Comcast are justified as would any deliberate interference with open and free communications. If we lose the ability to communicate openly and share information without fear of corporate or government reprisals, we will have lost this country. We will have lost another freedom that makes up the American democracy.

Annette Blanchard

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Stop omcast from Internet block of online content. This corporation has been using Web filtering technologies, much like what is used in China. Comcast, as well as other Internet corporations, must remain neutral. Where would it stop????

Keith Bracy  
1505 W. 58th. St.  
North Little Rock, AR 72118

Let me start by saying that I am a Comcast customer, and would change service if I had a choice. AT&T is the only other high speed internet provider in my area, and I attempted to change my ISP over to them. The only problem is that Comcast is the only provider that serves high speed internet to my residence at this time. AT&T has repeatedly told me that my address isn't in their database. Again, I would change service providers if able, even though I would have to subscribe to a land telephone line that I do not need in order to do so. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast, AT&T, and other providers should not be allowed to prefer one internet application over another. The FCC should put an immediate across the board halt to that practice. Peer-to-peer applications are an important means of communication. They are not just tools for pirates. To quote Goerge Washington: "It will be found an unjust and unwise jealousy to deprive a man of his natural liberty upon the supposition he may abuse it."

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In retirement, I could not build a home in a desired location because of the tight, non competitive control given to the big corps that

prevent the spread of High Speed internet to needed areas. Only free competition can do that. I have had to move to an undesired area to get good educational information of my choice. According to whatever statistics you observe, The U. S. ranks from fifteenth to twenty-sixth in the availability of high speed, inexpensive and broad coverage of internet and other communicative service. And, this service is the most educational and informative that a society can have. We certainly can not thank our legislators for doing this to our great but slipping country. Ashamed and pissed, Dr. James Gaskins

To whom it may concern, The argument that Telecoms deserve payment from content providers is transparently ridiculous. We, their customers pay for the bandwidth. As bandwidth needs increase, if the megalith telecoms can't meet the demand, someone else will step in who can. This is the free market solution. The anti-democratic solution telecoms propose is not free-market; it's corporate welfare and American's will recognize it as such. Keep the net neutral. - Dylan Hurd

Chad Jennings  
905 Green Valley Drive  
Bryant, AR 72022

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Stephen Spies  
2900 W. 4th St.  
Little Rock, AR 72205

Is the FCC/Comcast/SBC/AOL/Google/Yahoo now going to enter into the business of "thought control", too? Or am I in the wrong country? Are libraries still open? Or do I have to pay a fee now? I "thought" I was a US citizen...until now. I used to believe that if I didn't like the station, I could always switch channels (Internet sites). Now, is the FCC/Comcast/Etc going to determine which among many channels (Internet sites) I am allowed to even evaluate amongst, decide which the channels (Internet sites) I have an option to make a decision upon, content-wise? When did this become an elitist/facist country? I must've missed that coronation of the corporations as being mightier than the people, even Dubbya hasn't quite gone that far yet. In a practical vein, COMCAST gets to decide what my surfing choices are, even though Comcast demands my money every month? I sure as hell don't have an option to pay them what I think their content is worth, do I? Well, I have a practical answer - they will NOT get any of MY money if this censorship is allowed in the name of greater profit. I lived just fine for many years without a cell phone, cable TV or the Internet - if they want to tell me what to read, say or believe, and then charge me a fee, they can do without my money; I'd prefer to keep MY thoughts and views. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Sharilyn Stalling

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
