

Thomas Adamski
17 Council Dr
Oxford, CT 06478

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

This really kills me. Comcast PAYS know-nothing, apathetic people to act as seat ballast to keep out people trying to defend their rights to free speech, rights that are guaranteed by the Constitution, which does NOT guarantee any company the right to create a monopoly. Does Comcast think ALL Americans are that stupid? Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. AT&T has also stated it was willing to take the same action to block peer-to-peer traffic and other specific traffic types. I believe Comcast should be the deciding case in this to prevent other Internet providers from taking the same steps as Comcast. One of the articles available on AT&T's stance is located here: <http://www.thenation.com/blogs/notion?bid=15&pid=221604> This trend is of deep concern to me as I don't want to live in a 'China'.

Eric Arnett

Jeff Becker
5 Cedar Hill Road
Easton, CT 06612

We have a right to free speech, to lead private lives, engage in unfettered commerce. Comcast acting as big brother violates those principles. We sign up for services, not censorship. Clearly, if they blocked phone calls, we would expect that there would be consequences, especially since we pay for these services. There should be no difference for phone vs internet and data services. Our system has become woefully unbalanced, with corporations holding all the power, and individuals and small organizations being squeezed further and further. Is our government of, by and for the people, as

enshrined in the Constitution, or in our Owellian world, has it become of, by and for the corporation? Freedom to do and say as we please is the foundation of our society. If this is no longer true, then we have become the dictatorship the founding fathers feared. The path forward, and our collective future rests in your hands. Please choose wisely and give us our right to be free from censorship. We the people demand it.

East Lyme, CT 06333

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation, and free speech. We cannot allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic, and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. If the recent disasters with the banking and mortgage industries show us anything, it is that reasonable regulation is required to prevent predictably self-serving abuse by major corporations. Large companies that operate markets vital to society cannot be trusted to act rationally in the long-term best interest of society absent rules that specifically prohibit bad behavior.

Jamie Doiron
55 Brittany Farms Rd.
New Britain, CT 06053

I attended the hearing at Harvard on Monday, Feb. 25. I would like to thank you for having a public hearing, as I found it to be very interesting and pertinent. I am writing an undergraduate thesis on network neutrality, so this is very important to me. I would like to say that as a business major (MIS), I understand that it is important to manage networks. Every network is managed. However, the delaying of packets by comcast is inexcusable. They should not tell me how I can use the internet. Additionally, if they need more bandwidth, they should invest more bandwidth. One other note. I have read, and witnessed myself, that Comcast paid non-employees to stand in line to hold the places for employees. There were many people in the room who admitted to being paid to sit there to hold spots for comcast employees. I understand that some comcast employees might want to attend, but there were a hundred people who could not get into the room, my friend Michael among them. He was concerned, and his spot was taken by comcast, who clearly has a vested interest in the matter. Something is not right here. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

David Dougherty
282 Pershing Ave.
New Britain, CT 06053

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Tyler DuBois
56 B Leonard Street
Stamford, CT 06906

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Jessica Duch
131 West Main St
Plantsville, CT 06479

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I think it's comparable to a telecommunications company deciding which areas I can and can't contact via phone. It's also comparable to segregation by income, education and social standards. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I worry Internet providers will soon only allow the biggest names in business to offer open web sites to the public, as they block traffic to smaller sites. I worry an open Internet will become another perk of wealth, while the poor will once again be cut off from information about their government and the world, as well as the economic and social processes that shape their lives.

Francisco Duenas
3 Shaw Dr
Simsbury, CT 06070

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications

by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. PLEASE PENALIZE COMCAST WHERE IT HURTS THE MOST. IN THEIR POCKET. THEY ARE DISGRACEFUL.

Will Duggan
110 Chestnut Hill Road
Killingworth, CT 07419

Are you kidding me? Stacking the hearing with day workers/ This is low " not unprecedented in the annals of corporate manipulation of our representative system, but low nonetheless. I am a Comcast customer. I depend upon the internet access I BUT FROM THEM to UPLAOD as well as download content to and from a WIDE ARRAY of internet sites and connections. I am appalled at their nerve, excessive reach and distortion of the issues of free and unbridled internet access. I PAY FOR THE SERVICE!!!! If the promise of a truly competitive telecommunications environment had actually materialized in my neighborhood, I would have long ago switched away from their services. But I can't. My family and my work are dependent on free and unbridled access " up stream and down. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jann Draper Elliott
2 Greenwood Avenue
Bethel, CT 06801

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In general, Comcast is an awful company. In our neighborhood they have frequently gone around blocking internet connections on individual houses without leaving any notice of having done so, and then it can take more than a week for them to return to remove the block. This interferes with the ability to work from home, to pay bills, and to communicate by email, which at this point, has become the standard mode of communication. This company needs to be supervised very closely to make sure they are providing the public with the service that it claims to be providing, and the service that the public is paying for.

Margaret Ennis

Stephen Hope-Ross
82 nicole dr.
naugatuck, CT 06770

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Also, the fact that Comcast kept people out of a public hearing for net neutrality further promotes the fact that Comcast is willing to do whatever it takes, even stifling the option to gain knowledge, to get money. I want to access the internet, unrestricted, to gain whatever knowledge I want, and as a college student, I feel extremely offended that somebody would want to restrict that freedom from me. If net neutrality it violated, then there really will be nothing that is really opinionated. It will do nothing but convince me that America is really just inducing propaganda to the public, and there's nothing we can do about it. Money really will equal power.

Joshua Hopkins

Late last year Comcast was caught secretly inspecting Internet traffic and crippling users' ability to share files, download video and use other popular Internet software. This is a gross violation of Net Neutrality, the longstanding principle that protects free speech online and preserves an open Internet. Thankfully, after a complaint was filed, more than 23,000 concerned citizens contacted the Federal Communications Commission, and the FCC is now investigating Comcast's blocking. Thanks to the efforts of thousands of concerned citizens from around the country, the FCC held a public hearing in Boston, Massachusetts, on February 26. Although the hearing was supposed to be open to the public, Comcast paid people to fill the available seats at the hearing and people that came to speak out against Comcast were not allowed into the hearing. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Milford, CT 06460

Comcast claims that it is interfering with BitTorrent transfers in order to manage the traffic on its network. The simple fact is that Comcast has oversold its service. They advertise speeds up to 6 megabits, however their network can NOT provide that level of bandwidth to every customer. Their business model is based on the assumption that each user will only use a fraction of the bandwidth available to them. When many users actually try to use what they've paid for, Comcast claims they're using too much and that it must start blocking certain traffic to keep the network running

smoothly. This is akin to a restaurant offering an all-you-can-eat buffet, but only putting out enough food to satisfy 25% of the customers who actually show up. Then, when they start running low on food, they begin asking people to stop eating. Comcast could also deal with this problem by lowering the connection speed it offers to each person. With each user limited to a lower speed, Comcast would have enough bandwidth to adequately service them all. However, Comcast doesn't want to do this because a lower speed is less attractive to users looking for a high-speed connection. So in a nutshell, Comcast wants to attract users looking for high-speed internet service, but it doesn't want those users to actually USE the service it offers. Personally, I consider this a deceptive business practice and Comcast should not be allowed to get away with it. I also happen to think that they should face some kind of discipline for paying disinterested people to fill seats at the recent hearing in Boston on this matter. The only purpose of such an act is to prevent people who are generally opposed to what Comcast is doing from attending the hearing. This shows exactly how low Comcast is willing to stoop to keep their deceptive business practices in place.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It is also quite disturbing to hear of the FCC's tolerance for Comcast hiring people to stand in line to hold places at the hearing for "employees" who slept through the FCC's hearing. This dastardly action by Comcast had the effect of excluding the Public from the FCC hearing. Absent any FCC sanction against Comcast for this behavior, it really does look like the FCC is colluding with Comcast to exclude the Public from its hearings. Why does the FCC want to exclude the Public from this vital discussion? Are any members of the FCC current or former employees or contractors of Comcast? If so, did they recuse themselves from this hearing? An honestly run government agency would reschedule this hearing in a room large enough to accommodate every single member of the Public who would like to attend, and strictly limit the number of Comcast "employees" who want to come and sleep through it. An honestly run government agency would do this. Will this FCC behave like an honestly run agency in this case? Yours in Disgust, David Manchester Niantic, CT

Kyle Marrotte
115 Depot Road
Mansfield Depot, CT 06251

Information wants to be free - a saying I heard many years ago from another friend of mine, and a saying I've believed true ever since. Our human desire to learn and to understand is instinctive, and it is a God-given right for the people of our nation to seek knowledge, unrestricted from those that would wish it filtered for their benefit. Free Speech is a founding principle of our country, an idea I believed in so strongly that I enlisted into our United States Army to defend. Above all else, this right of our people should be held, for our right to be uncensored is truly our defining trait. It is what separates us from most of the rest of the world. Comcast and many other ISPs are actively working against Net Neutrality, attempting to deny or censor information for their own ends. Be it for profit or otherwise, their lies, hypocrisy, and downright greed are undermining everything this country stands for. I strongly urge you to take into consideration the importance of your decisions in the upcoming hearings for Net Neutrality - you make the difference

between an Internet that is by and for it's users, or an Internet run by the highest bidder. Those of you with the power and the authority to make the right decision, I humbly ask that you do. -PV2 Kyle Marrotte, Connecticut.

Daniel McAuley
49 Vitti St
New Canaan, CT 06840

The Internet has evolved from a hobbyists toy to the de facto way of communication for millions of people every day. With increased regulation at the very heart of this system, the freedom, to which up until now we felt was inherently embedded would simply be gone. "Network Regulation to Improve the Internet Experience" is the most hypocritical defense anyone can boast. The Internet is fundamental in it's freedom to the same degree of any persons ability to step outside and visit any place they want (or are allowed into). The regulations in question could be manipulated and abused even further than just filtering a select few internet protocols. All Comcast (or any other provider) has to do is decide what is suitable for its customers in order to "help regulate network congestion". I see a lot of room for abuse. BitTorrent is a 100% legal protocol that is being discriminated against. While we're on it, I bet blocking competitors web sites would improve Comcast's network performance as well.

Comcast is in violation of the civil rights of Internet users by eavesdropping on Internet communications and blocking communications the company does not endorse. There is no moral or ethical difference between a telephone wiretap of a private conversation and an IP tap into the communication between Internet users. Both are violations of established constitutional law defining the privacy rights of individuals. Comcast's effort to block or hinder certain types of communication amounts to Internet censorship. The Constitution prohibits the government from censoring private communications in the open. How much more of a violation of Constitutional liberty is it when a private corporation

censors communication in hiding? Neither corporations nor governments are fit gatekeepers for a technology which not only promotes the freedom of speech but the access to speech and to the ability to speak on an basis equal to that of any other citizen, however powerful or wealthy. With the neutral Internet, free speech has received the greatest technological boost since Gutenberg invented the moveable type press. Whatever the temptations of power or wealth may be, no matter how enticing it may be to block or bar certain kinds of communications "however objectionable they may seem to some of us, the flow of information on the Internet must remain absolutely free, with equal access "and thus equal justice" for all who use it.

Southbury, CT 06488

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I am a web host myself, and what if I were to see that my site were filtered, just due to the fact it wasn't known. Some of the best content on the internet comes from those small, unknown sites.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications

by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In Addition my personal Comments would be to Comcast. The internet is not something you own. I would love to say F Comcast and have everyone boycott your "SERVICE" what you provide is not a necessity of life. There's always a way around the bigwigs that want to control everything if it means economic gain and just for the sake of power. F Off Comcast.

John Pritchard

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Freedom of informatio is vital to a free world. In the United States, as free law abiding citizens, we should have unfettered access to the intranet and other new technologies as they become available. We should be able to communicate and access information freely as the law allows. Private corporations such as comcast should not be allowed to censor our activities without our express and open knowledge and permission.

Comcast's abuse of power was demonstrated when they cut off BitTorrent users. Comcast does not own the internet!!! I pay a lot for high speed internet access from them and that is what I expect - WHEREVER I choose to surf! Pass the Internet Freedom Preservation Act and end this discrimination against the free flow of online information. I work from home and access to web sites is crucial to my job. Comcast should not be able to decide which of the web sites I use can be fast and which can be slow. Their secretive practices need to be stopped and the precedence needs to be set for other ISP's. I'm so thankful to find out about this in the hopes that I am one more in the masses of people and I believe that can make a difference. Comcast may have money (including MY money!!) but we have the fight for the freedom that we believe in. The internet should be controlled by US - the people who use it!!

Milford, CT 06460

Respectfully, I am requesting that the FCC take action to prevent discriminatory practices against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Recently I was informed that the Comcast has blocked certain types of communication over the Internet. This concerns me, as access to the Internet should not be restricted. Respectfully, I am opposed to any type of metered or "tiered" service. Each person who uses the Internet should be responsible for violations of copyright law, if any. As well, I support abiding by the terms of copyright law. But, at the same time, telecommunications firms, like Comcast, should uphold the tenets of an accessible and unrestricted Internet. Indeed, as more persons use the Internet to enroll and participate in such worthy endeavors as earning credits via the auspices of online universities and the like, unrestricted access to the Internet

becomes not merely desirable; it becomes a necessity. This is why I am requesting support for the terms of the Internet Freedom Preservation Act. Thank you for your consideration. Sincerely, Charles R. St.James

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It's particularly unfair and objectionable that Comcast paid people to fill space at the Feb. 26 hearing in Boston who were so uninterested in the issue that they took the opportunity to nap. Meanwhile, more than a hundred people with legitimate concerns were left out in the Boston cold.

Marcy Weiner
25 Wintergreen Hill Rd.
Danbury, CT 06811

Comcast has a virtual monopoly on cable TV in Danbury CT. They keep reducing the number of channels to the basic plus listings that we purchase- but raise the price. They recently took off a number of channels to make them premium and the TV channel guide- but did not reduce the price! It costs us over \$50 to receive basic plus!!! Others in Connecticut where they have alternatives pay less for substantially more channels and a better selection at that. COMCAST IS A GREEDY COMPANY THAT HAS NOT SERVED US WELL. PLEASE, PLEASE, BREAK THEIR MONOPOLY OF CABLE TV IN OUR AREA. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.
