Honolulu, HI 96822

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Due to a disability, I am homebound and rely on the Internet for information and contact with others on multiple issues in multiple areas. Net Neutrality insures my access to ideas and to others. Comcast would dictate my fundamental freedom of access to ideas and other people. Please protect my freedom of access from entities such as Comcast. Thank you for considering my request that you act in the public's interest.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Whether or not one supports Net Neutrality, the process used to decide critical Internet policy should be open and fair. So far, I have not seen that. In addition, even though big companies do not favor Internet neutrality, they have not agreed to formal or even informal limits on their power. Comcast is a perfect example of this. They will not even admit what the AP confirmed is true - they are blocking BitTorrent.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Literally, the internet is the one bright spot on this otherwise dark existence called modern America. Don't stomp out the light on the best of humanity in America to bolster a few bottom lines RIGHT NOW. This type of action will hurt everyone involved in the future due to: less innovation, less democracy. For me, it would signal the need to look elsewhere to live where information can be available without corporate guards. There is no one who wants this except the corporations -- that is not democracy.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The above is boilerplate, but I agree with all of the comments listed. I believe that these companies are only interested in furthering their own services while blocking out competitors under the guise of "network management". There is plenty of room available for all parties to get along, the infrastructure just has to be invested in. With all of the "Dark Fiber" in american soil, surely their has to be more than enough backbone capacity, and if Japan, Korea and many other countries can figure out how to get high speeds at the "Last Mile" (e.g. to the consumers residence) so can we. The Internet needs to be protected from those who would seek to monopolize and control it. Jeffrey Jones

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

In addition to the complaints below, there is proof that Comcast paid people to occupy seats at a recent hearing in order to prevent the general public from participating. This is a crime, and must be prosecuted!!! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. What is surprising is that any company would want to put a stop to the very thing that causes them to profit in the first place- the natural emergence of innovation that occurs in a free and open system like the internet, which ultimately benefits everyone. Capping such a system for the remuneration of a single corporation, is not only short-sited, it is capricious and selfish, all at the expense of the well-being of the public. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
