Bloomington, IN 47402

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Lafayette, IN 47905

I am a Comcast customer by force, as they have recently taken over Insight communications in my area. I am concerned about Comcast's blocking of peer-to-peer communications. This is a throttle on free speech, and is exactly why we need Net Neutrality. I believe the FCC should take action on this issue. Comcast has proven that it will go to any length to squelch public outcry on this issue and deny citizen's their constitutional right to free speech, as was evident yesterday at the public hearing on Net Neutrality when they paid people to fill seats in a public hearing in order to prevent critics from attending. The Internet is the future of our economy and it must not be run by corporate interests. If you allow companies like Comcast to determine what is important, or not important, on the Internet you have given the entire future of communication over to private interests. You will be signaling the death of free speech and democracy.

Janet Born
326 N. Park Ave.
Batesville, IN 47006

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Bloomington, IN 47408

Comcast is WAY out of line blocking peer-to-peer communications by their customers. They do not own the internet, and have no right forcing their own agendas down our throats. The FCC needs to take immediate action to stop Comcast or any internet service provider from blatantly discriminating against the free flow of information. The internet is vital to every aspect of the economy, and is an extremely valuable means of civic participation and free speech. We can't have corporate interests attempting to stifle open communication. If you let them get away with this, blatant censorship is sure to follow. Please, put my tax dollars to good use.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation, and free speech. We simply cannot allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic, and stifling innovation. It is absolutely imperative the internet be incorruptible by corporations and governments!

Lafayette, IN 47904

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Now Comcast is taking over Insight Communications! Please stop this!

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I do NOT want companies to be able to hinder my ability to pull up websites as fast as possible. They have already hindered the United States' commercial viability by refusing to upgrade the infrastructure of the internet. The fact that we lag behind many other countries in terms of data speed to peoples' homes is terrible.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Ruth Kobbe
3513 MacArthur
Indianapolis, IN 46224

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Fort Wayne, IN 46845

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. It is also obvious that Comcast is neither contrite nor remorseful about their actions, as their "real world" actions of blocking access to the net neutrality meeting at harvard has shown. It is precisely this which will result from corporations such as Comcast being able to control net access and thrupt. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Without Net Neutrality protections for consumers, ISPs like Comcast will continue to block many types of content as well as legal and legitimate traffic without full disclosure to their customers -- leaving those customers with no appeal, and in many cases no alternative for access. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

frankfort, IN 46041

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I live in a rural area of Indiana, and use the internet for a myriad of purposes. Net neutrality is critical to me and should not be infringed upon by anyone. Please enact Net Neutrality protection. Thank you for considering my opinion on this matter.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I believe in America. I believe in the greatness this country stands for. The Internet, by and large, is a great example of American greatness. A tool that enables instant communication around the world, a tool that gives the little guy a shot in the face of stiff competition from the large incumbents in their markets. A tool that promotes freedom of speech and expression, and enables the spread of such values around the globe. I see it sparking greater interest in the political and civic process. It gives the people unparalleled ability to voice their opinions and be heard by not only their friends and family - but thousands of people (in some case millions or billions) around the globe. It allows for every day people to make a difference in the world around them. Why are we not taking whatever steps we must take to ensure a good solid future for this wonderful tool? Comcast, Verizon, AT&T and others have been lobbying against network neutrality, simply because they want to line their pockets even more. They want to be the gatekeepers who get to tell the rest of us where we can go, and how fast we can get there. But honestly, why should they have the right to tell me where I can and can not go? Why should they be able to tell me what traffic is good and what is bad? Look, for instance, at Comcast and it's recent behavior of blocking peer to peer bittorrent traffic. As a user of peer to peer technologies regularly (and now former Comcast customer), I experienced this happening to me regularly. I use peer to peer technologies to view free online video content from places such as Democracy Now! , completely legal and legitimate uses of the technology. The network operators are running scared, though. Part of it surely is influence from organizations such as the MPAA or RIAA, but some of it also is their horrible practice of overselling their capacity. They bank on users not using what they paid for, and when people DO start to use what they have already paid for the ISP's start to freak out and want to meter the internet and prevent us from getting our moneys worth. Why? They don't want to spend the money to upgrade and update their infrastructure unless they absolutely have to. It's no wonder the US is lagging behind other nations in Broadband. Please, stop letting the corporations tell us what we can and can not do, let the PEOPLE decide - not Comcast. Last I heard, Comcast can't vote - people can. That should tell you who to listen to.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
