

Kirby Alexander  
1408 W. Willow St. #b4  
Lafayette, LA 70506

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Sincerely  
Kirby James Alexander

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Now we learn that Comcast paid "seatfillers" to keep interested commenters out of a hearing in Boston. Comcast has actually admitted to this. Is this consistent with the public trust that we require of our broadcasters?

New Orleans, LA 70112

Keeping the internet free and neutral is vital to the empowerment of the masses. The phenomena related to the digital divide include the inability to actively participate in civil discourse, obtain health information and news, and to meet and network with peers. All of these are activities enjoyed by the privileged. As the digital divide is narrowed, the new internet users have the right to utilize this resource in the same manner as those who have been using it for years. Net Neutrality! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Leonard Martin  
655 Napoleon Street  
Baton Rouge, LA 70802

To the FCC: Please investigate Comcast's sneaky blocking of peer-to-peer communications and place sanctions on them. If the principle is ever established that ISPs are not common carriers, but can carry what they want and reject what they want, here's what will happen: 1. They will start charging site owners extra for non-crippled service. 2. Small businesses and nonprofit service providers of all sorts will find those charges a huge barrier to getting effectively on the Internet. Most will not make it. The existing big companies will. There goes innovation, and, more importantly the Internet as an avenue of communication democracy! 3. ISPs will have no incentive to innovate ways to increase bandwidth without taking it from users. Therefore they won't--or if they do they'll take their own sweet time about it. I realize that this FCC is always all for business. Please at least be for SMALL business. Cordially, Leonard Martin

Bossier City, LA 71111

Actively seeking to block US citizen from exercising their right to the democratic process in the real world can only be interpreted as a glimpse of Comcast's intent in the virtual world. The Internet is the "public airwaves" of this century. As done with radio the government has a duty to protect that which gives voice to those who would not be heard. The United States cannot afford any further hedging of the rights that have brought us this far. Nor can we survive in the emerging global economy if a few in our own country short the future for immediate and fleeting profits. Please, do you duty, keep the democracy a place of freedom of expression and ideas. thank you

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It's not just peer-to-peer. If you allow this, it will open the door to further filtering of information. We already have enough of this through other media outlets, and our own government. Giving telecommunications immunity for giving authorities information under the table is another perfect example of this. If they are not breaking laws, why do they need immunity? I realize that is not related to that issue, but our freedom of information and free speech is quickly being taken from our grasp. If we don't take action now, we'll settle for nothing later.

Monroe, LA 71203

I do not use peer-to-peer communications, but as a Comcast customer, I pay almost \$50 for internet. Why should I not be getting the same "internet" that other users get when I pay that much?! This is outrageous!

Stephanie Norris  
3609 Constance St  
New Orleans, LA 70015

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's actions are horrible. They have effectively denied concerned citizens of their basic rights. The rights to politically express viewpoints and to gain insight into important public issues are the core freedoms afforded citizens of a democracy. Without the freedom of expression and freedom of public knowledge any democracy is such in name only. The actions taken by Comcast and others represent and demonstrate a philosophy that is opposed to such freedoms. I hope that this petition demonstrates the point that this is not just a question of "packets" but it is a question of people.

I never want to have to utter the words "I told you so," this is why I side with Net Neutrality. These days, many corporations are springing up with loose morals and business ethics and they will continue to push the envelope to see what they can get away with. Corporations are one of the most powerful forces in the world and should be setting the prime example of morals and proper business etiquette when it comes to bettering consumers lives with their products. We need to learn to put our foot down when they go too far, otherwise they will walk all over us and control what we can and can't do online. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.
