

Jeffrey Acton  
2510 Brighton Ave.  
Kansas City, MO 64127

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Blocking of peer-to-peer communications by Comcast is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC should take serious and immediate action to put an end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Democracy requires an informed citizenry. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jason Blair  
10196 west sweetwater road  
mineral point, MO 63660

Before we get to the pre made comment below, I'd like to express my anger that this is still an issue. I can only assume that those in charge of making these decisions do not understand net neutrality, have never been subjected to data discrimination, or have someone other than the public's best interests in mind. I can accept reasonable network management, but targeting and blocking specific users and only certain protocols is data -discrimination- and should not be allowed. Unfortunately, the comments of the public will never be given as much attention as those from the lobbyists who are no doubt arguing that their respective companies would never do such a thing, even though Comcast has already done this, is doing this, and doing it under the guise of network management. I can only hope that those in the decision making process will see this for what it is, and write net neutrality -back- into the law. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating

against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Sincerely, Jason Blair

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Hey, Stop Comcast Web blocking! Support protecting free choice on the Internet. When you block a public debate you are wielding your political and financial power to shut out debate and shut up the people. How can you live with yourselves when you are disrupting and blocking the very foundations of communications policy? SHAME ON YOU!!!

Peter Hinshaw  
1011 Bourn Ave  
Columbia, MO 65203

I am appalled that the FCC is allowing this economically destructive activity to be conducted by Comcast. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Do your job. Spare your children the humiliation of reading about you in the history books implicated in this scandal. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

John Johnson  
3502 Finley St.  
Joplin, MO 64804

I am very concerned about the attempts of Comcast to control my access to the destinations of my choice on the internet. Their past examples of blocking peer-to-peer communications and their expressed desire to further erode if not do away with Net Neutrality should be a concern to all Americans. I work as a computer network administrator and free access to internet communications is vital to my livelihood. With recent reports of Comcast blocking access to an FCC public hearing at Harvard by "seat stuffing", I certainly would not want to trust my freedom of access to them. I hope the FCC will take serious and immediate action to end the harmful practices of Comcast and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Springfield, MO 65807

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an

abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of legitimate, online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Peer-to-peer communications are becoming a popular way for dealing with high traffic data distribution, especially those with sporadic usage like Linux downloads. As an example, the last version of Ubuntu was almost completely unavailable from the main site or any of the mirrors. However, through a peer-to-peer network, and hundreds of thousands or even millions of people willing to help share the file, users were still able to download at full speed. The unfortunate people who were stuck with Comcast were unable to participate in such a network and would have to wait until everyone else downloaded it before they could have a turn, like some sort of second class citizen being forced to the back of the bus.

Robert Owen  
109 Orchard Street

FCC, I agree 100% with the quoted text that follows. Although the current Administration seems to favor monopolies and near monopolies, this will not always be the case. No government or private entity should have the ability to determine how any other individual, group, or company uses the internet, or what sites they choose to visit, or method of delivery (in either direction) people choose to use. "Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. You can not imagine when my daughter sends me pictures of our animals and they are blocked and I have to fuss and work hard for a bit to get to see them how angry it makes me. I do not appreciate having my e-mail blocked. I am intelligent enough to mark the things that are junk so I do not get them but to have things blocked from my friends makes me angry. I do not appreciate it one bit. This has happened a lot in the past 6 months. I would like it to stop. Melda Spiker

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. An unrestricted internet is vital to the free exchange of ideas for the benefit of our democracy. Our founding fathers would not have allowed the restriction of speech on the street corner, and I am sure they would not have allowed the similar restriction of free speech on the internet had it existed at that time. Our democracy depends on the free exchange of ideas. Don't let this freedom slip away.

Gary Vogt  
5065 Wolverton Drive  
Florissant, MO 63033

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Although I am not a Comcast subscriber, if they are permitted to restrict access it will surely embolden other providers, including my own. The fact that they hid their actions is damning evidence that they knew what they were doing was fundamentally wrong. They must be punished accordingly. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Satyen Vora  
5247 Itaska St  
Saint Louis, MO 63109

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. This is no

minor offense. If we as a nation deny ourselves the rights that we profess in our own Constitution, we are no better than--dare I say--Communist regimes in countries around the world who deny their citizens free speech and the freedom of information. We cannot allow corporations to own what is becoming one of our nation's greatest strengths and now a necessity for many. Instead of allowing bullying entities like Comcast to continue, this nation should be forcing them to pay for their actions and make an example of them. Freedom for all. Jeff Wain

It's time turn back to the time when FCC 's concern was the public good and not "the corporate good". Net Neutrality concept is a tremendous democratizing force and as such should be protected. Listen to the will of the people. Thanks
