

Joshua Altemoos
95 Powers Street
Milford, NH 03055

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Gregory Anderson
126 Penacook Street
Concord, NH 03301

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The exorbitant monthly charge for Internet access through Comcast should provide full Internet access. I fully expect and demand the ability to decide what I do on the Internet without secretive manipulation and censorship.

James Anderson
48A Howe Lane
Hollis, NH 03049

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. 1 Mckinley Ave
Derry, NH 03038

I would like to say something, maybe in video format, maybe I want to share an important document I wrote. Let's say, I want to share it with my friends and because of the file size, I may need to use BITTORRENT to send it. Should my communication be blocked? Should my voice be haulted because Comcast does not like the protocol? I did not see any comments saying Comcast can block my internet / packets when they want to. I would not have agreed to pay them if they can simply block traffic when they want. And, I don't really have many choices (for broadband). If Comcast uses public roads to lay their network, if people can die from hitting these Telephone poles (public safety), then shouldn't the public get something equal back? Shouldn't free speech go un-hindered? Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Peter Avitabile Jr.

"Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation." This is what was already put here by Savetheinternet.com and I agree. Comcast does not have the right to decide who sees what content on the web any more than the phone companies can decide what we can talk about on the phone. Comcast is using its considerable influences to sway hearings their way to get what they want and that is wrong. This is supposed to be people discussing the state of the internet, not big business throwing money around to get their way. Comcast must not be allowed to continue with their immoral actions and the FCC can help stop them.

Ian Cassias
33 Edgewood RD
Durham, NH 03824

I have been directly affected by Comcast's blocking of peer-to-peer communications. In my experience, this activity goes beyond mere traffic shaping or a decrease in performance. Whenever I attempt to use a bit-torrent client, Comcast completely blocks all internet traffic to my house and I have to reset my router and modem in order to reconnect. This denies me the ability to use the internet services I have paid for. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. christopher chisholm
75 woodward rd

merrimack, NH 03054

Comcast's blocking of internet traffic is troubling in many ways. For one, it highlights the lengths corporations will go to to squeeze every last penny out of everything and everyone. Comcast wants nothing more than to be able to selectively charge for better access to the internet. This would allow them to sell prioritized internet to those willing to pay the most. Those willing to pay the most would likely be other corporations, and thus millions of people would be denied fair access. This leads to the larger problem; Comcast's action are totally and completely against free speech, which is the core idea of democracy and the United States. Many of the great reforms in the United States have been against corporate greed, which would inevitably seek to control the majority of our population. This may seem like an extreme image for blocking some internet traffic, but make no mistake that it is the first step. It is critically important to stop Comcast now. By doing so, not only will we stop this particular company from controlling information, we will send a loud and clear message to any other company trying to take similar measures: "The United States will not stand for it".

Dylan Cobb
21 Walnut Street
Keene, NH 03431

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. C. Cohen
39 S Pine St.
NH, NH 03820

Comcast's lack of concern for its customers and interest in anything other than its ability to extract ever-increasing amounts of money from them has led to blatant and deceptive blocking of peer-to-peer communications. This is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Carson Cole
74 Ocean Blvd
North Hampton, NH 03862

Comcast actions at the recent FCC hearing in Boston were abhorrent. Their actions are consistent with how they have throttled my own net connections, and due to the lack of any other real competition in my neighborhood, I am stuck with accepting their censorship. I hope that additional competition is created in net access. But net neutrality is even more vital, because these net-providing companies will not be neutral in their desire to profit from the internet--a network they did not create, yet would seek to stifle.

Milford, NH 03055

As an Internetworking professional for the last 10 years, I have watched the Internet move from curiosity to commerce and from the fringe of academic and hacker cultures to the mainstream. I believe that any blocking based on destination or content should absolutely not be tolerated, and believe that Comcast, AT&T and Verizon in particular should be held to account for their proposed tiered model of pricing, which could price information out of the hands of people who could benefit from it the most. In such a model, if an ISP decided that www.loc.gov wasn't a revenue generator for them, they could place the Library of Congress site at the top of such a tiered model, making it only accessible by those with more money and taking valuable information out of the hands of those with the most to gain from it. This is an extreme example, but it is exactly such ad-hoc changes to network infrastructure that must be stopped. My guess is that they would make the site and the consumer BOTH pay for access, such that a very popular, and wealthy, site like Google might be able to afford to be given priority access. Where a very popular, but not-for-profit site may not be able to pay, and would be marginalized. It's an important issue, and you, the FCC are charged with determining whether the Internet is free and open as was intended, or if it is controlled with an iron fist and metered meticulously, as a Russian Oil Oligarch. Please don't let that happen.

West Lebanon, NH 03784

One of the important and beautiful things about the internet is it makes EFFECTIVE free speech more affordable and available to all. We have already started to reap the benefits, around the world, of this increase in our abilities to exercise our (in the US) constitutional rights. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Partially because of your recent decision to deregulate the newspaper, television and radio industries, the internet is quickly becoming the last bastion of dissenting opinion and international free speech. It is vital that special interests not be allowed to filter what information is available to the public. This issue affects the first amendment rights of every human being that participates in any online community. Do not allow Comcast's crimes to go unpunished.

Brian Napier
11 Beacon Street , Apt. # 4
Concord, NH 03301

Guys , I'd like to preface their text with my own Con Cast Nightmare !! About 6 or 7 years ago I had cable and phone with AT & T !! Then they sold ME , like I was a mere piece of chattel , to The Con Artists , Liars and Thieves of Con Cast !! It has been a Con Stant Battle ever since !! Take this past October , for instance , the cable went out twice for about an hour and a half each time on seperate days !! This has been a recurrant problem !! Then they added a new twist , their picture would just FREEZE for long blocks of time !! These events always ocured during shows I really wanted to see !! And although each and every year their prices went up 2 , 3 , 4 and even 5 times The Annual Rate of Inflation , my level of serive kept getting worse and worse and worse !! When this happened for the fifth time in November , I started ignoring them !! They disconnected the cable early in December and I felt like singing Free At Last !! The only problem was they disconnected my phone at the same time and left me without any phone for 4 very long days !! I'm older and disabled and in a medical emergency would have had to resort to sending out smoke signals if I had needed to Con Tact 9-11 !! Fortunately , that weekend no emergency arose !! I called Verizon and they have installed my new phone !! The new DSL should be up and running next week !! And I'm still waiting to hear about the satelite dish !! But I CAN live without TV , The IQ in my living room has simply soared since I switched on the radio to NPR and started listening to The BBC News World Service on my laptop !! However , this begs the question of their blocking friends from communicating with each other !! I have 2 Dear Friends out on The Left Coast , Cheryl in Seattle (who has Con Cast for her computer !!) and Joy on Victoria Island off of British Columbia (she does NOT !!) !! While I ALWAYS get thru to Joy in British Columbia , reaching Cheryl in Seattle , about an hour closer as the bird flies (with really very tired wings !!) is ALWAYS A TOSS UP !! Some times I get thru to Cheryl and somethimes I don't !! It's now almost a habit to send out things to her the next day which she probably didn't get the prior day probably because she was being blocked again by The Con Artists of Con Cast !! This really does disrupt the conversation flow !! Guys , I'm truly sick to death of Both Con Cast and Their Con Artists !! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Brian Napier
11 Beacon Street , Apt. # 4
Concord, NH 03301

Dear Mr. Copps et al , I hope that this finds you Guys well !! As I am disabled I was unable to attend yesterday's Hearing down in Cambridge !! However, had I tried to travel all of that way down there to attend I now learn that I would most likely not have been able to get into the roon because The Con Artists and Thieves of Con Cast paid SEATFILLERS to preclude the possiblity that the Real Concerns and Real Life Experiences of Real Citizens would ever be voiced !! While this criminal behaviour is Both disgusting and shocking , and I remain in Both Shock And Awe , it is a; too typical of how Con Casts comports itself !! Thankfully , I no longer have any relationship with Con Cast , regreably the same can not be said for Cheryl , one of my dearest elderly friends out on The Left Coast !! Joy out on Victoria Island , Cheryl in Seattle and I had an ongoing on - line converstation this past weekend !! However , I had to save and later retransmit the last 6 e mails because somehow Con Cast had blocked Cheryl yet again !! This is not only wrong , it is also disconcerting as we are all older and my first thought , of course , was a fear that something may have happened to her !! You Guys have simply got to protect Internet Neutrality and reign in these predatory practices of those like The Con Artists and Thieves of Con Cast !! Now as it is their nickel it is also time for their say on this matter !! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic

participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I work in the internet industry for a small design firm and I am legitimately concerned that a decision to ignore net-neutrality will have stifling effects on myself, and others in my profession in regards to small business, and innovation. This country does not run on the backs of corporate giants trying to stuff their pockets and make decisions for us on what we want to see on the internet. It is quite the opposite. Small businesses like the firm I am involved continuously push the envelope as innovators. Ignoring net-neutrality, handing it to the likes of commercial giants decisions will leave only the highest bidders, and the rest of our industry with no choice but to close our doors.

Shane Theriault

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast seems to be taking over and they are not a company with many morals either, they are all about big business. On a personal note, it took them close to a year to settle a suit I filed with them when they let an employee come into my house who was a pedophile and tried to take advantage of the fact I was a single (disabled) young woman living alone. He is still employed by Limfar a subcontractor of Comcast (even though they had told me he had been fired). I have no respect for the integrity of their company and have as many services as I can with Verizon. Their big business ways need to be stopped on the topic above and all the other ways they take advantage of their consumers as well.

Concord, NH 03301

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. This company has overstepped their boundaries more than once in my own life and the lives of my neighbors. They are a company that needs to be stopped. I was almost raped by a Comcast employee. After a year of trying to get a settlement for what I went through they still have him as an employee, though apparently not with the public, and they thought a small amount of money would heal my grievances. I would have been content to know he will never touch another girl again. If there was a way to have cable without them I would in a heart beat. My phone and Internet are both with Verizon after going through what I did. Plus now I always have to have someone with me when they come to hook up the cable, since the event I am very nervous around any worker in my home. It is more than what happened to me that matters; this company does not care! Though they do care about money, and becoming bigger, but they have vastly lost site of the public and the people they are providing services for. I rarely hate, it is a strong word, but Comcast is not a company I will ever respect. I am disabled, I cannot work, and unfortunately television and Internet are two things that keep me awake and occupied. If I was healthy I know I wouldn't even have cable, but the Internet is a vast part of my life, as a writer and someone who loves to learn, and also has to go to college by way of distance learning. Their disrespect for laws, morals, and the rights of their consumers needs to be taken into context, examined thoroughly and they need to be made to clean up their act. I appreciate you reading this and taking action. The public and myself deserve better. Thank you. ~Megan Walker - Age 22

I urge you to interrupt Comcast's blatant interference with my web communications. I know they are doing this with subscriptions such as Democracy Now!, as I have had to subscribe again and again since my move to NH where Comcast is my provider, compared with my long-time residency in NYC where Time Warner was my provider. The difference is night and day. I resent Comcast's illegal practice of choosing what comes to me via their cable (no CSPAN 3) and internet service. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate

action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I wholeheartedly endorse the above statement. Corporations that try to stifle free speech are hot houses for home grown fascism.

Comcast has been discriminating against peer to peer communications the way they do in China. Please put a stop to it. Preserve a relatively free press; it is the last bulwark against corporate control of the media, which is taking us down the path of Hitler and Mussolini. I teach history of political psychology at the U. of New Hampshire. I will use this as a case study. It is the canary in the mine. Larger companies are watching to see what the FCC will do.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Only an informed citizenry can prevent the despotic abuses that the Founding Fathers warned us about. A press free of corporate control, and the free flow of information over the Internet is vital to our democracy.
