

Linda Abrahamsen  
3489 Blanche Ave  
Cleveland Heights, OH 44118

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I feel the Internet should be viewed as a common carrier. As such, the ISP's should be viewed in the same light as bus companies, airlines and train services. Open to everyone under the US Commerce Code. They must remain neutral and not pass judgement or offer advantages to certain users to the exclusion of others.

As a concerned citizen, nothing bothers me more than what big business thinks it can get away with. Money should not be used to determine legislation or regulations. It is your duty to protect us from unfair business practices and blatant manipulation of the legal system. Comcast's hiring of "seat fillers" at the recent FCC hearings is ridiculous and should not be allowed, nor should the rest of their campaign of misinformation have any part of an informed debate. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. STOW, OH 44224

I just handed in my master's thesis on e-government in the United States on the same day that Comcast acted to spite our democratic society by silencing the will of the people in Boston. From my long investigation into American democracy in the internet era over the last 5 months, I have no doubt, along with the overwhelming majority of researchers and democratic theorists, that the internet is not only a crucial part of our modern democracy, but that we must act as a society to preserve the democratic resources inherent in the online sphere - and that if we don't, the forces of low culture and pop-politics will gladly take over at the expense of our most basic democratic deliberations. Please act in the interest of the American people and American commerce by following the majority advice of academics and experts in preserving net neutrality and equal access for all citizens to all resources of the internet.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Adam Cisler  
52552 East Drive  
Beallsville, OH 43716

Keep the internet in the hands of the consumers. There is no good reason for a company such as Comcast to dictate which web sites load faster or at all for the simple reason that someone paid off Comcast. For obvious reasons this is not fair to consumers who are effectively powerless to prevent a company from blocking or limiting access to sites who haven't paid off Comcast or others.

Hebron, OH 43025

Your job is important and challenging. You must weigh the virtues of marketplace economics against the accomplishments of freedom. Often they coincide peacefully. The right to choose from who you buy is one such example. However, Comcast, in its own interest, wishes to control access to its resources at the expense of equal access to all by all. You're faced with a choice. Should you trust marketplace economics and corporate efficiency or the American people? I appreciate that hard choice you must make. I offer my advice: Whenever in doubt, trust the common man.

Berea, OH 44017

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Karryn Hart  
9140 State Rt 29  
DeGraff, OH 43318

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Such actions as Comcast has taken should not be ignored. They should be rewarded for their illegal conduct and not with a slap on the wrist. They have no right to interfere with internet users choices. All pay ISP to access the net and use email without their interference or censorship. Please make Comcast an example to other providers that such conduct will not be tolerated and make the penalty fit their crime. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Cincinnati, OH 45236

Comcast must be stopped as all companies must be stopped when they try to shut down free speech. We MUST have laws to keep corporations from limiting our communications just as the Founding Fathers set limitations on the government so that they could not limit free speech. Without protections we might as well be in communist China. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I pay a considerable amount of money to have access to the internet through Comcast to promote my work and livelihood and I am tired of them telling me what I can do with airwaves and cables that we the public own. That is not the American way via the Constitution. Nor is any more the normal day Capitalism, it is the step into Fascism. One that will destroy this country and what it once stood for. The country that every one hoped that would be the greatest experiment destroyed because someone decided their oath to greed and money was more important than taking an oath to this country. An oath that I took four times as a police officer and Army Veteran and had no problem putting my life on the line for this country. One, that certain people, would never have the courage to do nor seem to have the courage to do what is right by the American people themselves. And that is to protect what we all own and that is the airwaves and public utilities that we ALL own not the corporation who have no loyalty to even take the oath to this country. It is time to put this country back on the right road of DEMOCRACY not FASCISM nor an OLIGARCHY. Honor our forefathers and start putting this country back on the path that they have dreamed for ALL people not the select few.

Matt Irwin

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It seems that more and more these days, huge corporations feel that they can do whatever they like, regardless of the law, without fear of being called to task for their wrongdoing. Far too often, this is exactly the case. It's time for this to stop. Reel these guys in and slam dunk them. That's what "WE THE PEOPLE" want.

New Richmond, OH 45157

Net neutrality and development is very important here is rural Ohio, as we face a globalizing economy. Small businesses and self-employed individuals like myself, which comprise much US job growth, need top-quality internet access, as a development asset. Emerging online peer-to-peer technologies are especially important, and are grassroots driven bottom-up innovations. My business needs these. Avoidable, negative civic and economic behaviors which impede local development, like large corporate anti-competitive practices, MUST be avoided. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The Internet was created with public funds; now that stewardship of this vital capital resource has been given to corporate entities, it is essential that they not be given power to control its use: they are to maintain the highway, in return for which they are well paid by its users; however, they must not be permitted to act as toll keepers or to establish discriminatory classes of service for users. The Internet must remain a public thoroughfare.

Steve Lull

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Also, from savetheinternet.com: Comcast Blocking: First the Internet â€" Now the Public There was huge turnout at today's public hearing in Boston on the future of the Internet. Hundreds of concerned citizens arrived to speak out on the importance of an open Internet. Many took the day off from work â€" standing outside in the Boston cold â€" to see the FCC Commissioners. But when they reach the door, they're told they couldn't come in. The size of the crowd is evidence that many Americans don't want giant corporations like Comcast and Verizon to decide what we can do and where we can go on the Internet. MarkeyComcast's sleeper cell But will the FCC hear these voices? For many people who showed up on time for the hearing, apparently not. Comcast â€" or someone who really, really likes Comcast â€" evidently bused in its own crowd. These seat-warmers, were paid to fill the room, a move that kept others from taking part. [Update: Comcast admits to paying people to stack the room in their favor. Read the report.] They arrived en masse some 90 minutes before the hearing began and occupied almost every available seat, upon which many promptly fell asleep (picture above). MarkeySeat warmers One told us that he was â€"just getting paid to hold someone's seat. â€" >> Listen to the audio He added that he had no idea what the meeting was about. If he was holding someone else's seat, he never gave it up. Many of this early crowd had mysteriously matching yellow highlighters stuck in their laps.

MarkeyComcast payoff We also photographed them outside the venue being handed papers by an organizer who had been seen earlier talking with several of the Comcast people at the hearing. Here's why this is a problem. Comcast clearly paid disinterested people to fill seats. This barred interested citizens from entering. More than 100 people who arrived at the appointed time for the hearing were turned away by campus police because the room was already full. ComcastBarred: The interested public The Cambridge hearing is part of the FCC's ongoing investigation into Comcast's blocking of Internet traffic. But there's much more at stake. We are at a critical juncture, where it will be decided whether we have a closed Internet controlled by a small handful of giant corporations, or an open Internet controlled by the people who use it. Comcast wants the former to dictate which Web sites and services go fast, slow or don't load at all. And they're backed by the other would-be gatekeepers at AT&T, Verizon and Time Warner. THIS IS WHAT THESE COMPANIES ARE ALL ABOUT: LIMITING FREE SPEECH TO INCREASE REVENUE. THIS IS WHAT THEY WILL CONTINUE TO DO IF NET NEUTRALITY IS NOT ALLOWED TO REMAIN. PLEASE DON'T ALLOW THEM TO DO THIS. EVER!

Frank Mann

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. KNOWLEDGE SHOULD BE FREE, NOT GOVERNED!

GARY C. MATHIAS

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The internet is perhaps also the greatest tool for education that has happened in the last century. Internet users, especially those that access the internet via broadband service provided through the cable companies, pay the highest price for access to this great tool and use it to build commercial enterprises as well as educate themselves and others. It is wrong that any cable company or any other provider have the right to restrict our access or interfere in any way with the potential commerce created by the internet. This needs to be stopped now. Internet users are among the best educated and most informed and I assure you that I most others also vote.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Patricia Opaskar  
3406 Hollister Road  
Cleveland Heights, OH 44118

Does our Constitutional right to freedom of expression apply to the Internet? If not, we might as well shut down both the 'Net and our ineffective federal government that cannot--or chooses not to--protect U.S. citizens' rights. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Paul Patton  
834 Parker Street  
Bowling Green, OH 43402

I am writing to request that you act immediately to stop Comcast's blatant and deceptive blocking of peer-to-peer communications. This is exactly the sort of problem that has led millions of Americans to demand Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The free flow of information over the internet is of vital importance to all Americans. The internet is, increasingly, the backbone of our society. It is all-important for economic exchange, civic participation, and free speech. We simply can't allow a limited number of corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I also would add that it is a disgrace that there are people who would try to decide what a person is allowed to read or not. it is a disgrace that such a thing would interfere with what is really going on. it is bad enough that the tv and newspapers are mere mind programming media, as opposed to being a avenue of information so that people can make their own choices. People have a right to read whatever they want, not corporate leaders who's only concern is profit and control, not freedom or rights of individuals. thank you very much for reading this.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Technology aside - think about the cultural effect that the internet has had on the United States and the World in the last 5 or 10 years. Can we afford to halt our cultural developments and bring it ten years into the past? Can we afford to doom an entire generation of quickly-becoming-not children by ripping away what has constituted their lives? Would you have banned Beatles records and bell bottoms from YOUR generation? And most importantly, how will the United States, as a nation among the World's nations, expect to remain the leader or even one of the major players in the global scheme without what the internet has done for us? We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Columbus, OH 43212

The internet has been the wildly successful place to do business that it is because of the, until now, assumed rules of net neutrality. Simply stated, the internet removes most of the barriers to entry that keep many small businesses and creative ventures from launching. Everyone can open shop in a space that is literally infinite. If we allow commercial interests to erect new barriers to entry, in the form of packet blocking and pay per visitor schemes, simply to make an extra buck; this fantastic resource that has leveled the playing field will be lost. No doubt the infrastructure that the internet is built on is expensive. Maintaining it is expensive and upgrading it is expensive. But we must keep in mind that users pay anywhere from \$20-\$100 a month for access to this high speed network, fees that should more than cover the costs to build and maintain the vast fiber optic networks the internet is built on. Remember too that this is in addition to the other services these companies are running on this same infrastructure such as: telephone services ( both traditional and voice over IP or "Digital Phone") and cable television. If this revenue isn't enough, providing a free and open internet should be seen as a charitable act buy these companies, and tax incentives should be offered accordingly. Allowing companies to put in place the means to charge on both ends is not only irresponsible, it simply isn't a good way to solve the problem of costs these companies claim. The internet has become a resource used not only for entertainment, but also education and most importantly communication. It is as important to our culture as the printing press, radio and television, and should be protected. In it's current state, the internet will doubtless be the birthplace of our next great innovations as a society, by allowing people, who before would never have met, to connect and work together. By allowing profit seeking entities

to dictate what data can move where, you would be destroying that opportunity of connection, and squashing the next great American innovators.

Technology has created a revolution of ideas and innovation in this country, and the free flow of the Internet is crucial to that process. Because of this, net neutrality is one of the most crucial issues to the future of our nation. By blocking peer-to-peer communications, Comcast is overstepping their boundaries and trying to take on a "gatekeeper" role in deciding what can or cannot flow over its Internet lines. What gives them the right to limit these programs or for that matter free speech, economic activity or civic participation? I urge the members of the FCC to put an end to Comcast's Big Brother ways. Please take action to end this practice and prevent future Internet providers from doing the same thing to stifle the free flow of information and ideas.

If I am paying for Internet access, I expect to get access to all of the Internet. If corporations block portions of the net, they need to notify customers of their practices so I can find an alternative provider. I access websites daily for news and other valuable information. I rely on my ISP for consistent access to all of this information. Net Neutrality protections prevent abuses of power when corporations use their discretion about what websites to stifle. Would they be able to block access to sites with anti-corporate messages or that espouse economic, political, or social views they disagree with? Allowing ISPs to block internet access would fragment the industry, creating niche providers that specialize in granting access to certain types of information. Would customers be in the awkward position of paying more than one provider for access to the whole net despite the common sense fact that the net is already linked together? The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Timothy Shelton  
1567 Commodore Cove  
Painesville, OH 44077

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem you have been warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example against the free flow of online information. We can't allow corporate gatekeepers to smother democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

America is a country where the RULE OF LAW is followed to provide justice and FAIRNESS. We are tired of Corporations continually trying to get around and influence the laws. Companies that do not agree with working within the rule of law should move to Communist country where they can become the media of the state. It is IMPERATIVE that the FCC protect the Internet and keep Corporations from stifling the freedom of the Internet. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

PS: Seriously, don't let a good thing go to waste, PLEASE!!!!

Alex Thompson  
130 Franklin Ave. Apt. 3  
Athens, OH 45701

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. What's at stake here is the freedom of speech, albeit speech that is transmitted in silent 1's and 0's. The access a free Internet gives to millions of people daily is too important to be usurped by a handful of massive companies looking to boost their

bottom line. Imagine the words President Clinton delivered at the signing of the Telecommunications Act of 1996. Before signing that bill, he said, "From the Pony Express to the miracle of a human voice over the phone line, American innovation and communications have broken the barriers of time and space to make it easier for us to stay in touch, to learn from each other, to reach for our highest aspirations." An Internet without Net Neutrality would stifle the very innovation and quite possibly the communication that was invoked when the 1996 bill was created. A victory for Comcast is a defeat for the freedom of speech, a defeat that could spark the beginning of a very lopsided war in which our increasing ability to communicate freely could be damaged irrevocably.

Ruth Thompson

Delaware, OH 43015

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. This is what happened to a friend of mine. The FCC held a hearing this morning at Harvard Law School on net neutrality. The hearing was scheduled for 11 am, so I got there early since I knew the place would be full. Well, when I arrived the hall was full of students and people who had come from all over the area. There were 3 policemen on the stairs and they wouldn't let anyone up as they said the courtroom was full. Some of those waiting said that the seats had been filled since 8 am by others holding seats for reps of the big media companies--Comcast and Verizon. A couple of people told me that some people had been paid to hold the seats. There was no audio-visual feed on monitors anywhere, though word came that there would be an audio-visual feed into another building starting at about 1 or 2 pm. About noon someone (no credentials) appeared and was taping statements from anyone who wanted to give them. He said that the statements would appear in the record (who knows?). There was live audio coverage on [www.fcc.gov](http://www.fcc.gov), but unfortunately I had not brought my computer. Finally gave up and went home. The above sickens me and so should it you.

Deer Park, OH 45236

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Also, the internet is the only modern non-discriminating tool that we have. Anyone with a computer and internet options has the same options as anyone else. The only main benefit of this is money in the big companies pocket

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I don't believe that a company who you are paying for a service has the right to limit the way you use that service. From a person who has very few options for internet providers, this is unacceptable.
