I am an artist, I try to share my works via a network of peer to peer clients. I suppose comcast does not believe I should be able to? How else should I GIVE away my works, you have to start somewhere. They continue to shut my connection down if I so much as open a peer to peer protocol. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I want to reiterate my commitment to Net neutrality, and my objection to gatekeepers. We must have free and open communication in order to have a free and open society. I believe this is important, not only to society, but to keep fresh and innovative ideas flowing to feed businesses, so we have a vital financial sector as well. I was introduced to the Internet at work, where it was vital for our business to succeed. I object to companies, such as Comcast, getting in the way by using tactics that are counter to innovation and to valid forms of competition. I believe such actions show lack of imagination and true business savvy. Such companies are stifling the vigorous economic growth that we need.

Mace Bowen
POB 1833
Salt Lake City, UT 84110

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The peer-to-peer communication model is what created the value of the Internet and attracted the millions of users of today. Selective blocking of communications by Comcast and others will destroy this value, making the Internet less attractive and more expensive. Selective blocking of communications by private corporations can't be excused on the basis of an appeal to free market economics. The Internet is not merely a commodity that corporations should be allowed to manipulate to their exclusive advantage. Sincerely, Mace Bowen

Fortunately for me, I live in Provo, Utah, and I have a 15MB/s fiber optic link to the internet, that doesn't get throttled. The problem is that one day I will have to move, and I will probably get stuck with Comcast or a similar ISP. I am writing to request that you put an end to Comcast's practice of throttling internet traffic and make the Internet a free marketplace of ideas. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The Internet has proven to be a vital media in the fight for freedom in the US and around the world. We cannot allow it to be usurped by a few large companies the way broadcast and newspaper media is going.

Pam Harrison
3672 S. 2025 W.
Roy, UT 84067

I am outraged to learn that Comcast engaged in blocking access to particular websites. I am a Comcast customer and this activity makes me seriously contemplate changing services. However, without imposing strict and timely punishment for this decidedly unAmerican act of censorship, I fear that any service I sign up with will have free reign to do the same. Net neutrality is extremely important to me. I implore you to step up to the plate and protect our access by taking action against Comcast. No immunity for them or phone carriers who have overstepped their bounds.

Larry Havrilo
860 Chariot Dr
Salt LAkeCity, UT 85367

Net Neutrality. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur. The FCC must take decisive and immediate action to put an immediate end to this deceptive and deceitful corporate interference. Additionally, prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Without total net neutrality corporate gatekeepers will smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Below is savetheinternet.com's copy/pasted comments. I'm leaving them there because I agree with them but first I want to say some things. I recently had Comcast after moving to a new area, I used to have Time Warner. One of the first things I did was call customer support and I was informed that Time Warner and Comcast are now one company. I don't see how that is not something considered a monopoly considering the way they control traffic and randomly increase monthly bills...But I digress. After switching to Comcast I almost immediately noticed breaches of net neutrality. I had to spoof my router as a computer because Comcast "doesn't support routers." Apparently they want each computer to have it's own connection. That is absurd. I also noticed that certain types of traffic, mainly bit torrent traffic, would cause the internet to come to a grinding halt for anywhere from five minutes of slow time to hours of down time. And I paid for this. And I had no other alternative. Please address these issues as Comcast is in a position of unfair power and is yielding it in a, dare I say, unconstitutional manner. Thank you for your time. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The deceptive monitoring of public communications by Comcast is exactly the problem we Americans have predicted would occur. The FCC should take immediate action to put an end to this practice and prevent other ISPs from following

Comcast's example. The Internet is a vital engine for free speech. We simply cannot allow corporations such as Comcast to censor and control these public communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Don't let Comcast off the hook. I appreciate the need to uphold copyright laws, but the burden should be on the end user. If certain technologies are stifled, a great number of legitimate activities will also be stifled. In particular, I am referring to distributed computing applications that may depend on P2P or similar file transfer technologies. If Comcast wants to combat piracy, that's fine. But they need to handle it openly.

Currently I am forced to use Comcast to receive broadband internet (it is the only broadband ISP available in my neighborhood). I have personally experienced Comcast's blatant and deceptive blocking of peer-to-peer communications. This is a direct violation of Net Neutrality protections. Comcast promises me Internet transfer at a certain speed, yet tries to surreptitiously cheat me out of bandwidth by deciding what I can and can't do with the "unrestricted" Internet I am paying them for. This is a fraudulent and dishonest business practice, but of course, Comcast doesn't seem to care. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I want to add my own personal message to the comments suggested to me from savetheinternet.com. I believe that what Comcast has done is in complete violation of human rights. We have the right as citizens of this country to have a say in how things should be handled. It is immoral and unlawful to privelage individuals (or corporations in this case) who have the means whereby they can push their own agendas by right of the money that they have. This is putting power into the hands of the few and stealing it from the hands of rest of the country. I am appalled that nothing has been done to make this right. I expect that something will happen. If not, I will make it a personal goal to spread my animosity to everyone that I know. And when I do, it will be done fairly and through educated means.
