

My Christian radio station is all I care to listen to-in it's current for, thank you. I am a music lover and am not opposed to most types of radio/music programs but I enjoy being able to count on the current type of content within the system now in place. I do not feel any compelling need to alter station formatting into a homogenous all-stations-created-equal system. Choice is imparitive and enjoyed by all. Please allow the open forum of the public access channels to remain but also allow the choice of the specifically Christian segment of the population the freedom from being forced to listen to differing political and religious positions. There are other platforms for that type of debate/input. Our listerner-supported stations are regulated by law as well as by the funding of their supporters, who are free to withhold that support if they feel it is necessary. No political or community restrictions on imput are warrented or desired. Please insure our 1st amendment freedoms!

The average American is facing and dealing with the diminished buying power of their hard-earned dollar and it appears that listener supported radio is having to deal with the trickle down effect of that reality. Please do not act in any manner that would put more strain on the financial requirments/needs of these stations.

I emplor you to be very careful not to feed into any form of regulation or government that would smack of "Big Brother's" control and censure.
