

I would really like to believe that the FCC has the best interests of the American people in mind. After reading about these potential changes, I felt obligated to voice my opinion. I recently found a great Christian radio station on the radio, and once I discovered the station's name, I later found that I could listen to it online too. I listen to it everyday at my desk at work. Whether it be on TV or other public radio stations, so much of what we hear and see today, truly go against Christian values. To be able to listen great music and positive commentary from the DJ's is so refreshing. With all the special interest groups and acts of trying to be politically correct, it seems Christian values have become a minority. Our forefathers, who were all Christians, lived and died for their rights for the many freedoms we enjoy today. Please, I am asking that you allow us Christians to at least have a radio station that we can support and let the radio station support us. Thank you for this opportunity and God Bless.
