

Air 1 Christian radio is very important to my family because it is positive music and has good moral commercials and discussions. Our community needs more of a good moral influence especially when you hear the sexually explicit music alot of chidren are listening to. Compared to other stations I can in good conscience have my children listen to the radio in the car. I don't believe having a board oversee broadcasters is a good idea, it can stop individuality, a station supported by donations should not have to increase staffing because it would put them out of business and small business is what America is based on. Radio power should not be taken from existing transators to boost up pfms that is unfair. Please keep America free for free speech the other religions have it and so should Christianity. Freedom of Religion is American.
