

To Whom it May Concern,

The new suggested FCC Regulations are not acceptable. It would affect free speech. If you have one biased group in charge of a local broadcast zone, then it could affect what is broadcast on the air. Specifically Christian radio. It would be a huge conflict if an atheist became in charge of a broadcasted zone in which there were several christian radio stations. They could make the local radio stations adhere to biased regulations that would go against christian beliefs. Such as being forced to support pro-abortion advertisements or secular views or advertisements going against Personal beliefs. Please consider the consequences of the new proposed regulations. Freedom of speech is our greatest National Freedom and is what makes our Country Great.

Thank you for taking the time to read my concerns on the new regulations.
