

I think that this regulations against the radio stations like KLOVE should be removed from the very idea being enacted. If this is allowed to continue then where will it end? If this regulation is allowed to take place then it will have to be enacted towards TV and radio also. At least with KLOVE i don't have to worry about what the language is being said. I don't care for what is being shown on TV and said on the other radio stations that premote sex and violence. Please do not go thru with these regulations. Thank You.
