

Please do not interfere with my local Christian radio stations ability to reach out to local communities with uplifting music, ministry/Biblical teachings, local and national news, weather, etc. They share mine and others family values. That is all I listen to. I choose not to listen to rock or country because I don't like the values often promoted in the lyrics and the vulgarity of language and subject matter often discussed on air. Radio is already fair and balanced. Everyone has the choice to listen to whatever they want to. If you are a conservative Christian there is Christian radio. If you prefer rock or country or classical or liberal talk radio or sports talk radio, or any other number of choices, they are all ALREADY available. If you happen across a station that doesn't support your choice of beliefs or musical style...here's a novel idea...CHANGE THE STATION! The government seems to be, pardon my language..."hell-bent" on stamping out religious freedom and forcing everyone to have a cookie cutter view of everything. There is tolerance for anything and everything under the sun...except for Christianity. Radio stations are doing just fine on their own regardless of whether they are Christian, conservative, liberal, rock, country, etc. They don't need the government to tell them what to do or who to have on some "advisory board". Advisory boards would be a nightmare and would force Christian radio to air viewpoints that neither they nor their listeners agreed with. I'm a Bible believing Christian. I don't believe in homosexuality, abortion, pre- or extra-marital sex, drug or alcohol use, or profanity. That is my right as an American, just as someone else has the right to believe differently. What makes this country great is that you have freedom of choice. Don't take it away. No one forces anyone to listen to anything they don't want to whether it is radio or TV....just change the channel and find one that is geared to your own likes and beliefs...simple, uncomplicated, no red tape, no governmental interference needed...please tell our ELECTED leaders to move on to something that does need some work...like gas prices and the hyperinflation we are experiencing...and please don't try to pat us on the head and tell us everything is fine and we MIGHT be heading into a recession sometime in the future or that inflation is only about 3-4 percent...give me a break...we're NOT stupid!!!! In a two month period egg prices DOUBLED in our area...and EVERYTHING ELSE has been going up steadily along with gas prices. Local radio stations are not the ones "out of touch" with their local communities...the government is...The government is the one that needs "advice" on how to best serve the people not radio and TV. Unfortunately we are stuck with them for 2-4 years before we get a chance to "change the channel"

Sincerely,

A conservative Christian from Arkansas
